

The Honorable Amit Bose, Administrator

Federal Railroad Administration

1200 New Jersey Avenue, SE

Washington, DC 20590

Re: Watco's 2023/2024 CRISI Grant Program Application: "Strategic Bridge Improvement and Sustainability Project"

Dear Administrator Bose;

On behalf of OxyChem, I want to extend my full support for Watco's 2023/2024 CRISI Grant Application - Strategic Bridge Improvement and Sustainability Project. This project proposes to complete at least 30% preliminary engineering and design work, including all environmental work, for 116 strategic railroad bridges that traverse waterways across the entire Watco network. These bridges are critical to safe and efficient railroad service to our facility.

OxyChem's Wichita facility produces and ships chlor/alkali products and subsidiaries. These products play a vital role in a variety of applications including water treatment, pharmaceutical production, refrigerant manufacturing, pulp and paper, aluminum and soaps and detergents. OxyChem Wichita relies on Watco for the transportation of these products to customers for end use.

Further weight restrictions and/or rail service disruptions due to the condition of the bridge(s) that serve our facility would severely impact the economics of our business model and would result in more truck traffic navigating local roads through business, commercial and residential areas to reach our plant. I understand Watco is applying for a federal CRISI grant of \$15.2M and will be providing a local match of \$3.8M if awarded. I applaud Watco for taking this big step forward in trying to address its' infrastructure challenges today and in the future.

OxyChem supports modern infrastructure that helps our economy grow and enhances the safety of the communities we call home, and certainly supports this CRISI grant application.

Respectfully,

Nolan McNeil

OXYCHEM
